Find the right size bracelet for you with the Gusti Leather measuring tape. Follow these 4 steps and find out your size in less than 5 minutes.

1. Please **print** this document in A4 size portrait format.
(Compare the length with a ruler or check against the size reference)

2. Now **cut** out the measuring tape.

3. To measure your wrist, simply wrap around and insert the end of **the measuring tape** into the slot near the logo.

➡ The arrow will show you the circumference of your wrist.

Note: make sure that the tape measure is not too tight on your wrist.

4. Now read the value, **compare** it with our table and order the right size. Enjoy your new bracelet!
